SUMMARY

3+ years building BIAMAQ's data platform: Python ETL from a SQL Server ERP to a data warehouse, BI and nightly recommendations. Final-year engineering student (UTN); Data Science exchange at CESI, France.

EXPERIENCE

Software & Data Engineer · IT Lead — BIAMAQ SRL Nov 2023 – Present

Industrial machinery, 3 branches · Full-time · Remote, Argentina

- Automated invoices, expenses and products with OCR/LLM and tax checks: manual time from 8 to 2 hours (75% less).
- Built Python ETL from the SQL Server ERP to a data warehouse, with daily loads and monthly snapshots scheduled with Celery.
- Built company-wide BI with ERP ETL and a data warehouse: sales, purchasing, collections, daily replenishment metrics and Power BI dashboards.
- Built a sales assistant on the ERP and DW with customer segmentation and nightly recommendations, twice as accurate as best sellers (~40% vs ~20%).
- Built Service BIAMAQ: versioned repair quotes, workshop tracking, ERP orders and Infolab history.
