SUMMARY

Since 2023 I build the data platform of BIAMAQ, an industrial machinery company: Python ETL from the SQL Server ERP into a data warehouse, the BI platform management uses daily and a recommendation model retrained every night on sales history. Final-year Information Systems Engineering student at UTN; Data Science semester at CESI, France.

EXPERIENCE

Software & Data Engineer · IT Lead — BIAMAQ SRL Nov 2023 – Present

Industrial machinery, 3 branches · Full-time · Remote, Argentina

- Built ETL pipelines that load the SQL Server ERP into a data warehouse (sales, purchases, stock, receivables, service and rentals), with daily loads and monthly snapshots scheduled with Celery.
- Built BIAMAQ Reports, the BI platform management uses daily: sales, purchases vs sales, 80/20 customers, receivables aging and workshop stock. Also maintain Power BI dashboards.
- Built BIAMAQ Sales, a tablet sales assistant connected live to the ERP, with recommendations learned from sales history (top-3 hit rate from 32% to 40% in temporal validation) and nightly retraining.
- Run the infrastructure: Docker on Linux servers and CI/CD with GitHub Actions on a self-hosted runner.

Python · Pandas · SQL Server · Celery · Redis · Django REST Framework · React · Power BI · scikit-learn

SELECTED PROJECTS

Last.fm Data Platform — Personal project · Data Engineering github.com/deadour/lastfm-data-platform

Data platform over ~117k listening events: incremental API ingestion with resumable backfills, Bronze/Silver/Gold layers in Parquet, MusicBrainz enrichment and a Streamlit dashboard.

Python · Parquet · Last.fm API · MusicBrainz · Streamlit · pytest

Diabetes Prediction with Deep Learning — Academic project · CESI France · Team of 4

End-to-end ML pipeline on a highly imbalanced health dataset: PyTorch model, oversampling and threshold tuning to cut false negatives, SHAP/LIME explainability and a FastAPI prototype.

Python · PyTorch · Keras · NumPy · SHAP · LIME

EDUCATION

Universidad Tecnológica Nacional (UTN FRRe) — Resistencia, Argentina Final year in progress

Information Systems Engineering

CESI École d'Ingénieurs — Rouen, France Spring semester 2026

International academic exchange · Data Science master's programme · ARFITEC scholarship

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Go

Data: SQL Server, PostgreSQL, Pandas, Parquet, ETL, Data warehousing, Power BI, Streamlit

Machine learning: scikit-learn, PyTorch, Keras, NumPy, SHAP

Backend: Django, Django REST Framework, FastAPI, Celery, Redis, REST APIs

Infrastructure & testing: Docker, Linux, Nginx, GitHub Actions, Google Cloud Run, Vercel, pytest, Playwright

CERTIFICATIONS

Power BI: Desde cero para principiantes — Udemy, 2024

Introducción a Machine Learning — Informatorio Chaco, 2023

Inglés Técnico para Desarrolladores de Software — Nivel 6 — Centro Universitario de Idiomas (CUI), 2023

LANGUAGES

Spanish (Native) · English (B1) · French (A2)
